THE STAR-SPANGLED BANNER

AMERICAN NATIONAL ANTHEM
BY FRANCIS SCOTT KEY, 1814

Oh, say can you see, by the dawn's early light,
What so proudly we hailed at the twilight's last gleaming?
Whose broad stripes and bright stars thru the perilous fight,
O'er the ramparts we watched, were so gallantly streaming?
And the rocket's red glare, the bombs bursting in air,
Gave proof through the night that our flag was still there.
Oh, say does that star-spangled banner yet wave
O'er the land of the free and the home of the brave?

HONORARY DEGREE RECIPIENT

Kyle Clark

Doctor of Technology & Innovation, Honoris Causa

Kyle Clark is CEO of BETA Technologies and the leader of all technical and strategic components of the business, including design, test and certification strategy, and commercialization of the ALIA aircraft platform. Mr. Clark is one of the test pilots of the three experimental eVTOL aircraft BETA has produced to date. Mr. Clark has founded companies in the areas of electrification, energy storage, and collaboration software. He was previously the founder of iTherm Technologies and subsequently the VP of Engineering at Dynapower Company, where he created and managed an engineering team that designed, manufactured, certified, and deployed power systems ranging from 100 kW to 36,000 kW. He holds patents to his name in the areas of electrification, thermal management and sensing technologies. Mr. Clark received a degree from Harvard University's school of Applied Math and Engineering. Mr. Clark is also a pilot and certified flight instructor with over 2,000 hours in fixed-wing and rotorcraft aircraft, including a type rating in the Embraer Phenom 300, and has completed over 200 test flights in electric aircraft.

CHAMPLAIN COLLEGE THEN & NOW

Champlain College began in downtown Burlington in 1878 as the Burlington Collegiate Institute, a for-profit commercial college founded by educator George W. Thompson. During the next eighty years, the school changed ownership and names several times, becoming Champlain College in 1958.

In the late 1950s and 1960s, Champlain transitioned to a nonprofit junior college offering associate degrees in Business, Accounting, and Secretarial Science, as well as adult continuing education programs. The College moved to the Hill Section in 1958, purchasing the Victorian-era Freeman Hall to serve as its new academic and administrative headquarters.

Champlain College broadened and diversified its academic programs in the 1970s and 1980s, rolling out career-oriented associate degrees and certificate programs in Business, Education, Human Services, Hospitality and more for traditional undergraduates and adult learners. As its enrollment increased, the College acquired additional Victorian homes in the Hill Section and constructed two new academic buildings: Joyce Learning Center (1972) and the Hauke Family Campus Center (1989).

The College transformed itself again in the 1990s and 2000s, transitioning to bachelor's and master's degrees and distance learning programs. Its new baccalaureate programs included Multimedia and Graphic Design, Website Development and Management, and e-business and Commerce. Champlain's Game Studio began in 2004 with a major in Electronic Games & Interactive Development. Its distinctive Core liberal arts curriculum and InSight personal finance and career positioning program, both established in 2008, remain key components of its multidimensional undergraduate education.

In 1993, Champlain launched one of the country's first online academic programs, offering full distance learning as well as hybrid online and in-person programs for adult students. After years of steady growth, Champlain College Online experienced a dramatic expansion in enrollment in its associate, bachelor's, graduate, and certificate programs following the 2013 introduction of truED, a pathbreaking education partnership with the U.S. Office of Personnel Management.

Champlain's campus has also grown considerably over time. In the 1990s and 2000s, Champlain constructed the Robert E. and Holly D. Miller Information Commons (1998), the S.D. Ireland Family Center for Global Business & Technology (2004), and the IDX Student Life Center (2005). In the 2010s, the College opened The Roger H. Perry Welcome & Admissions Center (2010), Miller Center at Lakeside (2011), Center for Communication & Creative Media (2015), and five new residence halls. Champlain established its study-abroad campuses in Montreal, Canada, and Dublin, Ireland, in 2007 and 2008.

Champlain College now enrolls more than 3,000 undergraduate and graduate students. In the last decade, Champlain has introduced new undergraduate programs, including Digital Humanities, Sonic Arts,

Interactive Narrative for Games & Digital Media, and User Experience & Interaction Design; launched its Degree Design Lab and Social Impact Scholar program; and established graduate programs in Digital Forensic Science, Healthcare Administration, and Information Technology, among others.

In 2021, Champlain College's Board of Trustees approved R/Evolutionary Champlain 2030, a strategic plan capitalizing on the College's strength as a supportive learning community that advances society by delivering uniquely future-focused academic programs, transformative hands-on experiences, and meaningful connections and collaborations that engage the passions of our students to create a better world. Champlain's size and stature have grown significantly since its inception in 1878, but its central mission of providing a radically pragmatic, career-focused education has remained remarkably consistent.

ACADEMIC REGALIA

Much of the regalia in today's ceremony originated in medieval European universities, such as Oxford. Since most of the professors in that age were church clerics, they wore heavy, rather austere, long robes with hoods. This manner of dress not only reflected their vows of poverty but also kept them warm in the drafty university halls of the period. As time passed, these hooded robes evolved into elaborate vestments that more closely resembled the colorful, symbolic fashions of the royal courts. These vestments were often made of colored silks with heavy embroidery. Different styles of hoods (which were now entirely symbolic and no longer designed to cover the head), mortars (a stylized cap popular at the time), and cassock-like gowns displayed the loyalties, disciplines, and levels of achievement of the wearer.

As early as the 1700s, academic costumes found their way to America at the University of Pennsylvania and Columbia University (then King's College), and perhaps at a few other colleges founded in colonial times. Toward the end of the nineteenth century, Gardner Cotrell Leonard, of Albany, New York, undertook the stabilization of the costume's symbolism after his family's firm designed special regalia for Williams College in Western Massachusetts. The American Council on Education has updated the academic costume code three times since then, most recently in 1986. For all colleges and universities that adhere to the Intercollegiate Code, the general descriptions are the same, although certain institutions have made slight modifications when permissible.

The color of the gown is commonly black with no trim for the bachelor's or the master's degree. The doctor's gown is faced down the front with velvet, with three bars of the same across the sleeves, and may be worn open or closed. Rarely, the trim of the doctor's gown can conform to the color code for the edgings of hoods and the tassels of caps. Ordinarily, the velvet is either black or dark blue, since the most common degree title is doctor of philosophy. The color code is the same for all degrees, although the binding or edging of the hood varies in width: two inches, three inches, and five inches for the bachelor's, master's, and doctor's degrees, respectively. Similarly, the hoods vary in length. For example, golden-yellow velvet—five inches in width, bound to a black thirty-six-inch hood with panels on each side and lined with satin colors—displays a doctorate in a field of science, with the satin lining indicating the colors of the particular college or university that awarded the degree.

The bachelor's degree has pointed sleeves and the gown hangs closed. The hood is optional, although if worn, it should conform strictly to the color and design code. The master's degree is indicated by an oblong sleeve, open at the wrist, with the base hanging and square-cut. The gown may be worn open or closed, according to the design; the hood is thirty inches, without side panels, and is bound with three-inch velvet.

Tassels for caps may be black or may conform to the color code, except that gold is most often worn for the doctor's degree. Members of the governing body of a college or university—and they only, whatever degrees they hold—are entitled to wear doctor's gowns, but their hoods may be only those of degrees actually held by the wearers or especially designed by the institution. The chief officer and the chief marshal may wear specifically designed costumes as approved by the institution.

INTERNATIONAL RECOGNITION

Champlain College includes global awareness as one of the core competencies in each of its undergraduate academic programs. To acquaint students with other cultures, our curriculum is designed to allow on-campus undergraduate students the opportunity to experience a semester abroad. These students have each been given a small medallion with the Champlain College seal to attach to their gowns.

At Champlain, both on campus and online, we have a number of students from other countries who choose to pursue their higher education with us. The flags you see displayed today on-stage represent countries, other than the United States, from which our graduates come.

The twelve countries represented are:

Antigua & Barbuda	Germany	Peru
Canada	Hong Kong	Puerto Rico
Cayman Islands (territory)	Libya	South Korea
Gabon	Netherlands	Uganda

THE MACE

The College Mace was commissioned by the late Edward P. Lyman Sr., former Vice President for Development. It is carried by the College Marshal, who leads the procession at Commencement and other formal academic occasions.

The Presidential Mace is a gift from William G. Post Jr., former Chair of the Board of Trustees, who designed and crafted it. It is carried by the President of the Faculty Senate, who leads the President of the College to the platform.

Sustain Champlain

In our efforts to become a more environmentally sustainable campus and community, Commencement 2026 includes practices such as using gowns made from recycled plastic fibers and reducing waste through recycling and composting whenever possible.
